## SUMMARY

Final-year B.Tech CSE (AI/ML) student who builds end-to-end enterprise-style AI applications: natural-language database querying, document automation, RAG, and multi-agent workflows. Certified in OCI Data Science, Azure, and IBM Watsonx.

## EDUCATION

**Vellore Institute of Technology** **2023 – 2027**
*B.Tech in Computer Science and Engineering (Artificial Intelligence and Machine Learning)* *CGPA: 8.75*

## TECHNICAL SKILLS

**Languages:** Python, C++, SQL

**Data & Analytics:** Pandas, NumPy, Matplotlib, Data Visualization (Streamlit ), Feature Engineering, Tableau, ETL

**AI / ML:** Generative AI, LLMs, RAG, Agentic AI (LangGraph), Deep Learning, NLP, Fine-tuning, Scikit-Learn, XGBoost

**Frameworks:** FastAPI, Flask, Streamlit, REST APIs, PyTorch

**Databases:** PostgreSQL, SQLite, ChromaDB (vector DB), Redis

**Cloud & Tools:** Oracle Cloud Infrastructure (OCI), Microsoft Azure, IBM Watsonx, Git, GitHub, Postman

**Coursework:** DSA, OOP, DBMS, OS, Computer Networks

## WORK EXPERIENCE

**Techlene Software Solutions Pvt. Ltd., India** **May 2026 – June 2026**
*AI Developer Intern* *Remote*

- Built a **natural-language database chatbot** that lets non-technical users query business data in plain English, turning questions into database queries and returning readable answers.
- Built an **invoice-reading automation tool** to replace manual invoice data entry, and a **speech transcription and sentiment analysis tool** to turn conversations into actionable insights.
- Owned all three applications end-to-end (planning, development, testing, debugging) and delivered independently on deadline.

## PROJECTS

**AI Proposal Evaluation System (R&D)** | Python, FastAPI, Scikit-Learn, SHAP, Generative AI, SQLite

- Built a **full-stack ML platform** (FastAPI + Streamlit) that analyzes R&D proposal PDFs and automates funding recommendations, reducing manual review effort.
- Designed an **ensemble scoring model** with uncertainty estimation and SHAP explainability so decision-makers can see why a proposal scored as it did; **Generative AI** produces structured evaluation reports stored in SQLite.
- Implemented a **PDF analysis pipeline** that turns proposal content into model-ready features, with a Streamlit interface for reviewers to upload proposals and view scores and explanations.

**Autonomous ColdMail AI** | Python, LangGraph, FastAPI, ChromaDB, SQLite

- Built a **multi-agent outreach platform** on LangGraph that automates company research, resume/JD parsing, semantic skill matching, personalized email generation, quality evaluation, human approval, and delivery.
- Implemented **RAG-based personalization** (ChromaDB + embeddings) and a **production-oriented FastAPI backend** with authentication, retry handling, and checkpointed human-in-the-loop workflows.
- Added an **LLM-based opportunity extraction agent** and replaced the initial Streamlit UI with a REST API-driven, five-view web frontend.

## CERTIFICATIONS

- **Generative AI Using IBM Watsonx (IBM)** **June 9, 2025**
- **Oracle Cloud Infrastructure 2025 Certified Data Science Professional** **September 25, 2025**
- **Microsoft Azure Data Fundamentals (DP-900)** **June 28, 2025**

## LEADERSHIP & ACHIEVEMENTS

- **Machine Learning Lead, Google Developers Group Club (GDGC)**, Oct 2025 – Sep 2026: led the club's ML domain team, driving AI/ML projects and hackathon entries and mentoring members.
- Ranked among the **Top 45 of 950 teams** in the Internal Round of Smart India Hackathon 2025.
- **2nd Runner-up** at CyberShield Hackathon organized by WiCyS Club.
